PROFESSIONAL SUMMARY

Software Integration and Test Engineer with 2 years of experience supporting flight software testing, test automation, embedded systems validation, and system integration for orbital launch vehicle platforms. Skilled in Python, GitLab, Linux, debugging, test planning, requirements analysis, and technical documentation, with additional experience in front-end development, API integration, UX/UI design, and cloud-based applications.

TECHNICAL SKILLS

Programming & Scripting: Python, JavaScript, SQL, HTML, CSS

Software Testing: Unit Testing, Regression Testing, Test Planning, Validation Workflows, Defect Tracking, Test Automation

Integration & Systems: Software Integration, Requirements Analysis, System Health Data Analysis, DAQ Support, Hardware/Software Debugging

Tools & Platforms: GitLab, Git/GitHub, Linux, VS Code, API Testing Tools, Supabase, Netlify, Streamlit Cloud, Microsoft 365

Engineering Documentation: Test Plans, Validation Reports, Design Documentation, Requirements Notes, Technical Change Reviews

Front-End & Web: React.js, React Router, REST APIs, Responsive Design, UX/UI Design, Accessibility

Design & UX: Figma, Adobe Creative Cloud, Inkscape, Canva, Wireframing, Interface Layout Systems

OTHER SKILLS

Software Troubleshooting, Technical Documentation, Analytical Problem Solving, Cross-Functional Collaboration, Requirements Analysis, Test Planning, Attention to Detail, Clear Written Communication, Data Analysis, Time Management, Initiative

PROJECTS

Orbex Space Prime Rocket Integration Test Dashboard: Developed a Python-based internal dashboard to support Orbex Space Prime Rocket software integration and testing workflows, including test result tracking, defect visibility, system health data review, and validation reporting (*Internal company project. Codebase and technical details confidential*)

Pathpholio: Developed a full-stack job application tracker with authentication, cloud sync, and a clean, user-focused interface | github.com/gititbunny/pathpholio

Weathif: Developed a climate scenario simulator that visualizes how temperature and rainfall changes impact local environments | github.com/gititbunny/weathif

Trovule: Developed a road trip planning app that combines route logic, weather checks, and cost estimates to generate simple day-by-day itineraries | github.com/gititbunny/trovule

EXPERIENCE

Junior Software Integration and Test Engineer – Orbex Space

2024-2026 - Remote | Forres, Scotland, United Kingdom

- Supported the development, testing, and integration of Orbex Space Prime Rocket software by building Python-based test scripts and validation tools for flight software testing, system health monitoring, and integration workflows.

Digital Designer – Laust Closet

2022-2024 - Remote | Bryanston, Johannesburg, South Africa

- Designed brand identity and produced digital designs for LAUST CLOSET, delivering cohesive visual systems, branded assets, and client-facing content across platforms.

Graphic Design Intern – Rikhotso It Solutions

2021-2022 - Internship | Randburg, Johannesburg, South Africa

- Produced brand visuals, marketing materials, and digital content while supporting UI/UX prototyping and cohesive design delivery across projects.

Graphic Designer

2020–2021 - Freelance | Sandton, Johannesburg, South Africa

- Designed, created, and delivered original digital designs, branding assets, and visual identity materials for clients across tech, fashion, and lifestyle sectors.

EDUCATION

University of South Africa (UNISA) – BSc in Computing 2026-In Progress

- Studying computing fundamentals, software development, data structures, algorithms, databases, and applied problem-solving.

Delac Foundation SheCodes – Diploma Junior Developer 2024-2025 (Bootcamp)

- Full-stack web development.

Delac Foundation SheCodes – Diploma Junior Front-End Developer 2024-2025

- Front-end development.

University of Limpopo – BSc Mathematical Sciences 2016-2018

- Computer Science and Statistics.

CERTIFICATIONS

- Delac Foundation SheCodes (2024-2025) - 12 Certifications in **Web Development, React, Python, and AI**
- Delac Foundation SheCodes (2025) - Career Development
